MULTIPACK

PAKKE- OG MERKESYSTEM

For the fish industry.

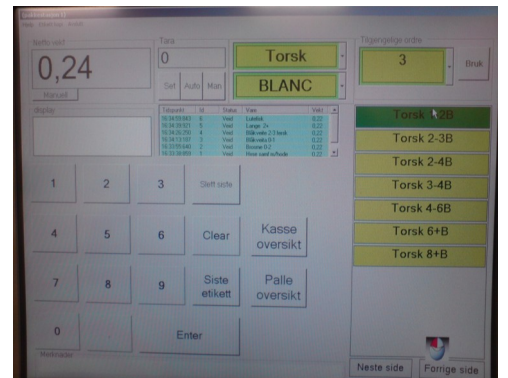

Packing with fixed-weight provides usually more fish in each box, as well as the entire packing process takes much longer. Experience with several of our customers shows that they get paid for about 2-3% more with the packing of variable weight, as well as the packing goes away much faster, often twice as fast. Variable weight = fair payment, saving hours of work and after control.

Invest in an affordable package from us and earn the investment cost back in a short time

See our website: www.multipack.no or call for more information:

MULTIPACK PACKINGSYSTEM

- PC-based system that simplifies the packing process significantly
- Stainless, waterproof PC cabinets with 15 inch touch screen
- Advanced order management, inventory management with full electronic tracking
- Weight and tare function directly on the Touch Screen
- Select fish species, quality and size directly on the screen (even with gloves)
- Box and pallet overview, with the possibility of correction of errors
- Wide range of reports that can be generated at any time
- Shipping documents, data export to other systems
- Re-labeling of one or more pallets with new information if necessary!
- When the last box is registered, you can print pick lists, reports and shipping documents and these can also be sent by email
- Easy to pack on MIX pallets of small quantities
- Integrated label editor to create custom labels, supports all languages
- Opportunity for batch printing of labels for products with fixed weight
